

CS 522—Mobile Systems and Applications
Assignment Eight—Chat App with Service—Rubric

-100 if any network communication or database I/O on the main thread

-100: If APK files not included (must be in **root folder** of submission).

70: Functionality (video demonstration)

- ☒ 20: Sent messages are received at destination; demo video shows at least two devices communicating (show messages in both directions)
- ☒ 15: Each app displays a list of messages received so far, updated when a message is received
- ☒ 5: Updating list of chat rooms when message received with new chat room
- ☒ 5: Toast message when message is sent
- ☒ 5: Sender saves message that is sent in its own database – no duplicates
- ☒ 5: No duplicates in the chat peer database (show multiple messages from sender)
- ☒ 5: Adding a new chat room
- ☒ 10: List of messages for that peer (two-line layout includes chatroom for each message); must have ViewPeersActivity working to get to this

15: ChatService:

- ☐ 10: Handler thread for sending messages is correctly set up
- ☐ 5: Implementation of send, handleMessage, run

10: ChatActivity:

- ☐ 5: Binding to service (including binding callbacks)
- ☐ 5: Initialize result receiver (onCreate, onPause, onResume)

5: Completed rubric

Total:

Zero marks if any network or database I/O on the main thread
